

SUMIT RAUT

Full Stack Software Engineer | Java | Spring Boot | React | Microservices

Pune, India | 8788225037 | sumitraut75147@gmail.com

LinkedIn: [linkedin.com/in/sumit-raut-3621b0233](https://www.linkedin.com/in/sumit-raut-3621b0233)

PROFESSIONAL SUMMARY

Full Stack Software Engineer with **3+ years of experience** in designing, developing, and maintaining scalable enterprise applications using **Java, Spring Boot, Microservices, and React**. Strong experience in building REST APIs, supporting cloud deployments on **AWS** (EC2,S3), optimizing application performance, and contributing to frontend development and integration using React. Worked across **backend** services and **frontend** layers to deliver secure, reliable, and scalable applications in Agile environments.

TECHNICAL SKILLS

- **Languages:** Java, JavaScript
 - **Backend:** Spring Boot, REST APIs, Microservices, Hibernate/JPA, JUnit
 - **Frontend:** React.js, Redux Toolkit, Axios, HTML, CSS
 - **Databases:** SQL, OracleDB
 - **Cloud & DevOps:** AWS (EC2, S3), Docker, CI/CD (Bitbucket Pipelines)
 - **Tools & Platforms:** Git, Postman, Kibana, Confluence, Jira, Braze, **GitHub Copilot**
 - **Core Concepts:** Distributed Systems, API Integration, Debugging, Performance Optimization, Production Support
-

PROFESSIONAL EXPERIENCE

DIGITAL SPECIALIST ENGINEER | Infosys | Sep 2025 – Present | Pune, India

- Designing and maintaining scalable **microservices** using **Java** and **Spring Boot** for global media platforms.
- Developing and optimizing **REST APIs** to improve performance, scalability, and reliability of core services.
- Engineered **renewal components** for newsletter platforms, improving subscription conversion and engagement workflows
- Supported containerization and deployment workflows using **Docker** and AWS.
- Troubleshoot production issues using Kibana and **log analysis**, improving system stability and issue resolution.
- Worked on **CI/CD** pipelines using Bitbucket for automated build and release processes.
- Collaborated with **QA, DevOps**, and cross-functional teams in **Agile** environments.

SENIOR SYSTEMS ENGINEER | Infosys | Dec 2024 – Aug 2025 | Pune, India

- Developed and maintained **APIs** for customer engagement platforms, ensuring secure and stable service communication.

- Automated campaign workflows using **Braze**, reducing manual effort and improving execution speed.
- Improved content management workflows by restructuring reusable components, increasing maintainability.
- Managed high-priority **production incidents** (P1/P2), ensuring minimal service disruption and quick recovery.
- Collaborated with stakeholders and engineering teams to support feature delivery and operational stability.

SYSTEM ENGINEER | Infosys | Jan 2023 – Nov 2024 | Pune, India

- Worked on modernization initiatives to migrate legacy Java systems to modern **Java** and **Spring Boot** architecture.
 - Designed secure backend services and implemented authentication and authorization.
 - Developed REST APIs to support application workflows and **frontend integration**.
 - Optimized database queries and backend logic for improved application performance.
 - Resolved defects identified during testing and UAT and contributed to code reviews and engineering best practices.
-

KEY PROJECTS

DIGITAL MEDIA & SUBSCRIPTION PLATFORM (MCCLATCHY)

- Developed **backend services** supporting subscription and campaign workflows for large-scale media platforms.
- Designed API layers enabling seamless communication between **frontend applications** and backend systems.
- Built reusable UI modules and optimized data flow for newsletter-based engagement features.
- Monitored production systems and resolved issues proactively using **Kibana**.
- Leveraged **Copilot** during development for faster implementation of React-based UI changes, REST API integration, and backend code improvements while maintaining code quality through testing and reviews.
- **Tech Stack:** Java, Spring Boot, React, REST APIs, Axios, AWS, Docker, SQL.

CHECKPOINT LEGAL RESOURCE MANAGEMENT PORTAL (LEXISNEXIS)

- Developed **secure APIs** with role-based access control for managing legal content.
- Built modular frontend components and improved UI integration with backend services.
- Implemented centralized API handling using **Axios interceptors** for error and request management.
- **Tech Stack:** Java, Spring Boot, React, Axios, Interceptors, AWS, Git, SQL.

WANDERLUST – TRAVEL MANAGEMENT PLATFORM (CAPSTONE)

- Developed full-stack application with React and Spring Boot for travel booking workflows.
- Implemented state management using **Redux Toolkit** for scalable frontend architecture.
- Built authentication and booking modules with secure backend integration.

- **Tech Stack:** Java, Spring Boot, React, Redux Toolkit, Hooks, MySQL, REST APIs.
-

EDUCATION

B.E. in Electrical Engineering

Government College of Engineering, Nagpur | 2018 – 2022

CGPA: 8.69

CERTIFICATIONS

- Infosys Certified **Java Developer**
 - Infosys Certified **React Developer**
 - Infosys Certified Spring **Microservices Professional**
-

ACHIEVEMENTS

- Received **Infosys Insta Award** for contributions to digital platform modernization and automation initiatives.
 - Solved **400+** Data Structures & Algorithms problems on LeetCode..
 - **LeetCode:** leetcode.com/u/sumitraut75147/
-

ADDITIONAL INFORMATION

- Strong experience working in **Agile/Scrum** environments with cross-functional teams.
- Hands-on experience in major incident handling and **L3/L4 production support**.
- Experienced in building secure, scalable applications across backend services and frontend integration layers.
- Continuous learner with strong interest in system design, application development, and end-to-end feature delivery.
